- Long-term Care Facilities

- Durable Medical Equipment Providers
- Rehab Facilities
- Surgical Facilities
- Diagnostic Centers
- Nursing Homes
- Pharmacies
- Hospice

Healthcare Receivables Funding

- We purchase your private – payer medical insurance claims to advance the funds you need. Once we have been paid the amount of our advance by the insurance company, we reassign the account to you so that you can continue to collect any patient – pay amounts remaining on the account, which you retain as funds.
- We purchase your third-party medical accounts receivable outright.
- 80-90% of the net collectable receivables are funded up front.
- The balance is remitted once the claim has been paid by the insurance company.
- Upon final approval, funding can be initiated within 24-hours.
- Fees are assessed on the funds advanced to you.
- Funding is non-recourse and off-balance sheet. No debt is added to your balance sheet and there are no monthly payments to worry about.
- This improves your cash flow. Allows you to meet your financial obligations, or expand and grow your healthcare services.
- We have flexible funding options. Customize your requirements to meet your needs, such as, how much funding you require and when you need it.
- This provides a steady and predictable source of revenue to support short-term and long-term objectives.
- We are not bankers and our underwriting focus is on the insurance company, therefore, we have fewer requirements of you.
